

TESTIMONIAL

We are an architectural design studio working on projects all over India ranging from Residential to Commercial, Institutional and Hospitality projects. Over time, during a span of over 30 years, we have won several design competitions and awards. Our team is about 30 persons. We work on designing the built environment, specific to each project. Sustainability is thought of at the very beginning informing all the design decisions.

I was a student of B.Arch at SPA, Delhi from 1983 to 1988. There's no doubt that it left a strong imprint on my mind which has shaped me as an architect and as a person. It was very liberating studying at SPA and all of us were free to pursue diverse approaches to design and architecture. The faculty was robust with their own unique approach to architecture. There were proponents of both, low cost and tech approach as well as high tech. What was consistent, however, was concern for people in general. We were also given enough freedom to pursue unconventional paths leading several contemporaries diversifying into other fields. The faculty was committed and showed us overall approach to problem solving and not just specific solutions or data. One was also exposed to other creative fields of music, theater, art, graphics, films and photography during the course of five years, giving us a good foundation to build one's core design philosophy.
